BALLAST ESSENTIALS

"AT A GLANCE"

DEDICATED & UNV INSTANT START

A contractor's best friend

Versatility: Run dozens of lamp types in hundreds of combinations – from 1 to 6 lamps

Simplicity: Reduce trips for parts, SKU-reduction, general & specialty lighting applications

Dedicated

Universal

SMALL RAPID START

Form factor: Compact, stylish, and lightweight casings ideal for sconces, downlights, and cabinet lights

Cost-effective solution primarily for T5, CT8 and CFL lamps

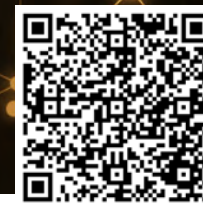

PN: DST-FLYER-ESS-FLUO

CFL & T5HO PROGRAMMED PREHEAT START

Programmed Start ballasts with Universal input voltage compatibility designed for CFL and T5HO linear lamps

Compact or linear designs suitable for various CFL lighting applications (residential, commercial, industrial)

BALLAST ESSENTIALS

"AT A GLANCE"

LOW TEMPERATURE REFRIGERATION BALLASTS

Recommended Applications include lighting for commercial freezers & refrigerators, or for pharmacy refrigerators to safely store vaccines

IceHorse ballasts automatically adjust in cold temperatures to provide optimal light output

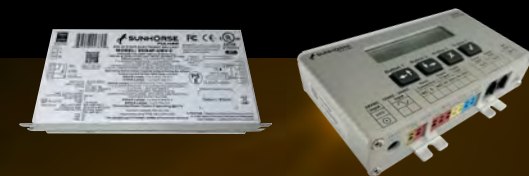

EMERGENCY FLUORESCENT BALLASTS

FireHorse EM ballasts provide at least 90 mins of reliable illumination in power outages

Compatible with a wide range of fluorescent lamps and a growing selection of common TLEDs

Low profile for integral mounting in the factory or field

GERMICIDAL UV & TANNING APPLICATIONS

Rapid Start ballast – Universal Voltage input for one or two lamps

UV Applications: water, air, and surface purification; tanning

Programmable and Dedicated output with lamp status indicator
