

14" Round Universal Voltage LED Retrofit Kit

The Fulham Vizion 14" Round LED Retrofit Kit (Part # VRMUNV036RD7yyA) is perfect for in-field upgrading of legacy, energy-inefficient HID lighting between 70-250 Watts – typically used in either dry or damp locations under gas station canopies or within covered garages.

Suitable and rated for dry and damp locations, e.g. gas station canopies and garage applications

This LED retrofit is expected to save ~50% power compared with old, inefficient HID lighting

Fast, easy Installation as 1-piece, integrated units; all parts preinstalled and pre-wired

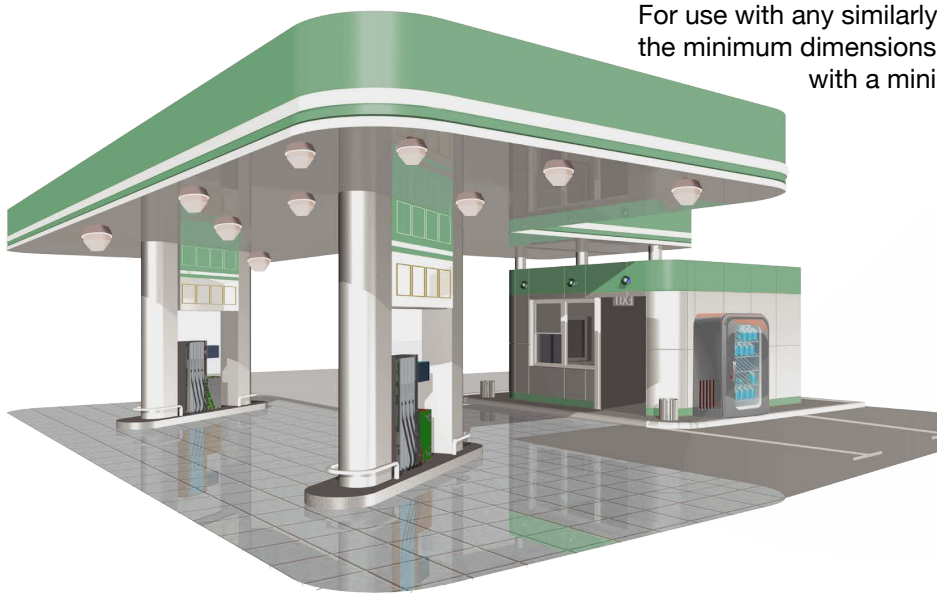

Low maintenance LED lighting technology equates to cost savings

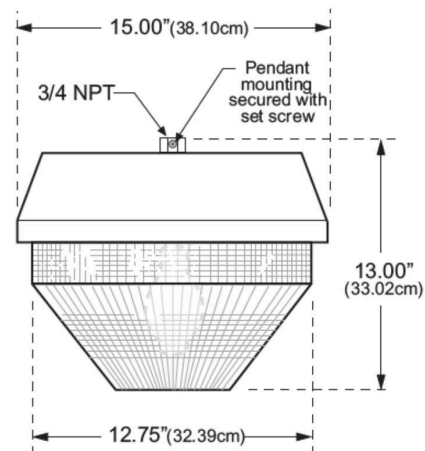

Quick Connects for driver input and output (no wire cutting needed for installation)

L70 > 54,000 Hours

Over 70% of initial lumen output maintained after greater than 54,000 hours of use saves money

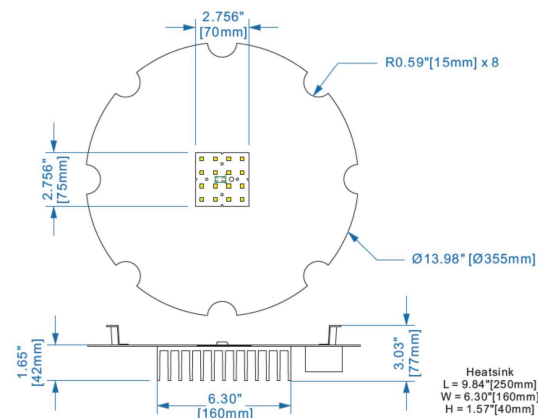

For use with any similarly-shaped luminaire greater than or equal to the minimum dimensions shown within the installation instructions, with a minimum mounting surface of 14" in diameter.

General Specifications

Input Voltage	120-277VAC, 50/60Hz
Input Current	0.34A (Max.)
Input Power	39W; Typ. measurement 37W
Initial Lumen Output	6,067 lumens @ 4000K / 70 CRI
Initial Efficacy	164lm/W @ 4000K / 70CRI
Dimming Type/Range	0-10V Dimming; 100%-10%
Beam Angle	120°
CRI	70 Standard; 80, 90 available
Est Lumen Maintenance	L70 = >54,000hrs / L90 = 37,000hrs @ 105°C Module Tc
Instant On/Off	Yes, no cool down time required
Surge Protection	10kV with SPD
Warranty	5 Years
