Guidelines

Environmental Rating

 The EZ EXIT EM luminaires have been evaluated for use in dry or damp locations only. If used in wet locations, acceptability and the need for additional evaluation shall be determined in the end product.

Electrostatic Sensitive Product (ESD)

- Fulham LED products should be handled with proper measures to protect against any potential ESD damage.
- · When servicing, personnel should be ground and direct contact with LED should be avoided.

Thermal Management

Proper thermal management has already been taken into account. To ensure life and reliability of the product, please use product only in emergency
mode.

Polarity Notes

- DC Modules are polarity sensitive.
- Ensure that "positive" from EM Driver is connected to "positive" of LED modules and that "negative" from EM Driver is connected to "negative" of LED modules.
- Polarities of modules are marked with "+" for positive and "-" for negative.

Battery Maintenance

- · Do not connect battery until fixture is installed.
- · In order to maintain proper operation and warranty coverage, the battery must be recharged once per year prior to installation.
