

TMU075007HLXXA

Constant Current LED Linear Module

- High Density, high brightness chip array for use in Class 2 Linear applications
- Constant current for maximum efficacy
- On-board connector for ease of assembly
- Available in standard CCT's
- Dimmable when used with a dimmable driver
- Suitable for use in retrofit rebate programs
- Optional lens to diffuse light
- 80 CRI standard and 90 CRI available

General Ratings

Max Lumen Output @ Max Current	970 lumens at 4000K / 80 CRI*
Nominal Current Input	700 mA (750mA Max.)
Nominal DC Power Consumption	6.5W (7.0W Max.)
Nominal Operating Voltage @ Max Current	9.3 VDC
Beam Angle	120°
CRI	80, 90
Operating Ambient Temperature Range (Ta)	-35 to +40°C
Maximum Module Case Temperature (Tc)	L70 = 90°C (Ts = 95°C) / L90 = 60°C (Ts = 65°C)
Estimated Lumen Maintenance (L70)	L70 = >60,000hrs / L90 = >36,000hrs
Color Consistency	Binning per ANSI C78.377-2008; 4 SDCM
Overall Size	11" x 0.94" x 0.24" (including connector)
PCB Material / Module Weight	CEM1 / 18 g
Maximum Screw Installation Torque	25 inch - ounces
Safety/Compliance	cURus (File # E351548) Class 2 Lighting System RoHS Compliant; CE
Energy Efficiency Label	A+ @Nominal Input Current
Warranty	5 years with suitable Fulham LED Drivers

* At Tc mod = 25°C

Thermal Specifications

With Connectors

Storage Temperature Range	-35 to 100°C
Operating Ambient Temperature Range	-35 to 40°C
Maximum Case Temperature (Tc mod)	L70 = 90°C (Ts = 95°C) / L90 = 60°C (Ts = 65°C)

Mechanical Drawings

Accessories

Interconnects

Wago Part Number: Single Pin **2060-951**

- Metal pin(s) to interconnect Modules
- For more detail information, please visit Wago's website: <http://www.wago.com/infomaterial/pdf/60291132.pdf>

11" Diffuser Lens (with 4 installation clamps)

Fulham Part Number: **TLE-OPT-120-003**

- white polycarbonate diffuser lens - 82% transmissivity at nominally rated currents.

Installation Steps when using clamps:

1. Place the LED Module on the luminaire surface.
2. Place the Clamp on top of LED module (line it up with LED module mounting hole).
3. Fasten the Clamp and LED module to the luminaire by using the appropriate (not provided) screws.
4. Repeat step a total of 4 times.

(The screws are not included with the clamps or lens.)

TMU075007HLXXXA

Termination Notes

- If connectors are used, use solid wire size 24 – 18 AWG, rated at a minimum 50V, minimum 105°C, and stripped to length between 6-7 mm (0.24-0.28 inches).
- Push button for insertion of conductor and for easy removal of wires.
- Connector Type: WAGO PN# **2060-451/998-404**

Push Button

Fastening Notes

- If fastening by screw hole, use any screw with diameter less than 0.185 in (4.7mm). Use all available screw holes to ensure good contact between back side of module and mounting surface. Refer to max specified torque for installation. Suggested screw sizes: #6 or M4 Pan Head screw.
- If fastening using double-sided tape, start with clean, oil-free and dust-free surface. Peel backing and place LED module on mounting surface. Firmly press down on the module to ensure good adherence. Follow the double-side tape manufacturer's installation instructions.
- BJB P2F (Push-to-Fix) fixing elements for PCBs can be used to fasten LED modules to mounting surface. Reference BJB's website for ordering information and specific model to use:
<http://www.bjb.com/index.php?pid=376706&lid=10>.
NOTE: Cannot be used when Fulham's white polycarbonate lens is being attached to the LED module. Use specified screws to fasten lens clamps and module to mounting surface

Environmental Rating

- Modules are rated for dry locations, unless option for conformal coating is requested.
- Conformal coating is RTV based and rated for Environment and Moisture Protection per IPC-CC-830.

Electrostatic Sensitive Product (ESD)

- Fulham LED products should be handled with proper measures to protect against any potential ESD damage.
- When servicing, personnel should be ground and direct contact with LED should be avoided.

Thermal Management

- Proper thermal management should be employed to ensure life and reliability of product.
- Use of thermal grease, paste, pad, or other material interface is highly recommended.

Polarity Notes

- Modules are polarity sensitive.
- Ensure that “positive” from LED Driver is connected to “positive” of LED modules and that “negative” from LED Driver is connected to “negative” of LED modules.
- Polarities of modules are marked with “+” for positive and “-” for negative.
