

### 3" Round VividHorse 120VAC CCT Selectable AC Engine Retrofit Kit

- •
- Dedicated 120V input AC Engine Retrofit Kit CCT Selectable: 2700K, 3000K(Default), 3500K, 4000K, 5000K •
- CRI90 standard, meet CEC Title 24 requirement •
- Potassium Fluorosilicate (PFS) phosphor LEDs to achieve as • high efficacy as today's CRI80 LEDs
- 5VA flame rated frosted lens included
- Suitable for open or fully enclosed luminaires
- Suitable for luminaires with plastic and glass lenses
- cULus Classified 1598C as a Retrofit Kit

#### **General Specifications**

Input Voltage / Frequency <sup>①</sup>	120VAC (+/- 10%), 50/60Hz

② With some phase cut dimmers, the engine will be dimmed to off

### **CCT Selection Indication**

- 1. The VividHorse DirectAC Engine Retrofit Kit is a dual-channel LED product that allows for CCT selection via a dip switch on the PCB. Available CCTs include 2700K, 3000K, 3500K, 4000K and 5000K.
- 2. A pre-set CCT will come from the factory. Check the product label or packaging to see the pre-set level.
- 3. Change the CCT dip switch position to "ON"  $(1\sim5)$  to set the desired CCT level.
- 4. Setting all CCT dip switches to the "OFF" position will result in no light output.

### NOTE: ONLY keep one CCT dip switch in the "ON" position; failing to do so may result in an undesired CCT.

### DirectAC Engine Retrofit Kit Equivalency Chart: FLUO to LED

DirectAC Engine/Kit (10W)			CFL CFL						
Engine/Kit Part Number	System Wattage	Lumen Output	Efficacy	CFL Style	Lamp Wattage	# of Lamps	Total Wattage	Lumen Output	Efficacy
VJT120010AC9TWB	1014/	000 las		Quad	13W	1	13W	775 lm	59 lm/W
VJTIZOUTOAC9TWB	10W	980 lm (4K/90CRI)	98 lm/W	Triple	13W	1	13W	825 lm	63 lm/W

NOTES:

LED is a point source and FLUO is 360, there is more light lost with FLUO especially during the reflection. Therefore it is recommended to use a 65 percent of the original light source total lumens when converting FLUO to LED. For example original FLUO lumens of 2000 x .65% = 1300 LED lumens. This is only a recommendation, and the installer should consider other factors for the application.
 For reference only, several factors apply.

**Optical Spectrum** 

#### NOTES:

The Color and Binning and Optical Spectrum charts are for reference only. For more detailed info, contact factory.

3) The Optical Spectrum values vary depending on product type and color rank.

### **Reduced Flicker Operation Feature**

- DirectAC Engine models have added circuitry to help reduce the Flicker when operated on the 50/60Hz power lines. The Flicker percentage on these models is below 30% when operated at line voltage, per CEC requirement.
- Dimming by line voltage devices may increase the Flicker Percentage as the power levels are reduced.

#### **Hi-Pot Testing (Caution)**

• All DirectAC Engine models are Hi-Pot tested on the Fulham production line. We advise NOT to apply AC Hi-voltage Dielectric test to LED products as this may damage the sensitive electronic components as well as the LEDs. Please inspect the connection wires for any nicks or cuts in the insulation during and after installation.

#### **Termination Notes**

- A luminaire disconnect UL listed connector is included, as part of the AC Engine Retrofit Kit. Use solid wire size 18AWG/12" per pole, rated at max 600V load and 105°C operating temperature.
- Strip wires to 11-13mm (0.47in.).
- Connector not for multiple use.
- For additional information on Wago's 873 Series Lumi-Nuts® connector, please visit:
- http://www.wago.com/infomaterial/wago\_ebook/51261593/flipviewerxpress.html

#### **Environmental Rating**

• DirectAC Engine Retrofit Kits are rated for dry and damp locations.

#### **IC Over Temperature Control**

• DirectAC Engine models have built-in thermal management. If the unit experiences higher than normal ambient temperature, the circuit will reduce the drive current to the LED there by reducing the thermal impact on the product.

#### **Fastening to Luminaire**

- When installing by "mounting thru holes" (recommended), use any screw with diameter less than 0.13in. [3.4mm]. Mount on a flat surface and use all mounting holes to ensure good contact between back side of DirectAC Engine Retrofit Kit and mounting surface.
- Refer to max specified torque for installation. Suggested screw sizes: #6 or M3 Pan Head screw. Fulham provides three 6-20 X 5/8" Flat Head Self Drilling Screws, see instruction sheets for further details.

#### **Electrostatic Sensitive Product (ESD)**

- Fulham LED products should be handled with proper measures to protect against any potential ESD damage.
- When servicing, personnel should be ground and direct contact with LED should be avoided.

#### Thermal Management

• Proper thermal management should be employed to ensure life and reliability of product.

### Wiring

- Intended for 120VAC (+/-10%) application ONLY.
- Connect the Black wire from the DirectAC Engine Retrofit Kit to the building Line by using the proper connectors or wire nuts.
- Connect the White wire from the DirectAC Engine Retrofit Kit to the building/source Neutral by using the proper connectors or wire nuts.
- DirectAC Engine does not need grounding, but the luminaire must be grounded.
- Do not wire on same branch circuit as motors, inductive type loads or heavy machinery which may introduce spikes, noise and other abnormalities onto the Line. Doing so may result in damage to the unit or abnormal lighting conditions.
