

Q2 2020 | Volume 25

Welcome to the Q2 2020 edition of *Illuminations*, the official source for new product and company updates from Fulham. Be sure to connect with us on social media, and [visit fulham.com](http://fulham.com) for past issues of *Illuminations* or more details.

Crucial Business – Doing Our Part

2020 has been uniquely challenging, and Fulham is both proud and grateful to be part of the solution via its diversified programs, including 20+ years in Germicidal UV SunHorse ballasts. Of additional relevance right now are IceHorse Refrigeration ballasts for use in systems transporting medicine, as well as Emergency Lighting Systems and everyday power supplies through Distribution that serve to keep facilities safely maintained and operational across the board. Our early outlook on operational impacts of the pandemic are documented in this Get A Grip On Lighting interview.

The Horse is Back!

We're excited to announce that Fulham has fully re-embraced its colorful, equestrian-themed, iconic, full-horse-silhouette branding that had previously made us both more differentiable and more *memorable* in the marketplace. As we introduce new product lines and programs (Back in the Saddle, etc.), you can expect the reclaimed Fulham tie-in. New logos as PNG and EPS files are downloadable here.

New Lighting Guide / Catalog

Fulham's "Lighting Bible," as it's often been dubbed by the industry, is back! This volume, entitled Fulham Presents WIRELESS CONNECTION, offers a robust collection of trivia, history, and lighting education that awaits you! And, oh yeah, we sell products, too. All the latest items are included in this refreshed guidebook available as a Downloadable 64-page PDF or as page-turning onscreen literature here. Enjoy!

Launched! Innovative Micro-Inverter

Our new FireHorse 25 Watt Micro-Inverter / Emergency Power Supply is reason to get excited! It works with any technology type (i.e. not just LED) for either one or a series of fixtures up to 150W in normal operation to deliver power in emergency mode at 25W for 90 minutes. Factory or field installable. Reduces SKUs when used with multiple fixtures, such as recessed cans. Visit the product page here or watch an overview comparison video on YouTube here.

Two Smartlink+ Sensors Added

This updated brochure outlines the entirety of Fulham's SIG Qualified Bluetooth® Mesh Lighting Control System, including two new EliteControl SmartLink+ sensors, as follows:

- ESLTOPJX00SR Short-range PIR occupancy, daylight harvesting sensor and *Bluetooth Radio* for connected LED driver
- ESLTOPJX00LR Long-range PIR occupancy, daylight harvesting sensor and *Bluetooth Radio* for connected LED driver

6W Field-Installable Constant Power HotSpot Emergency Driver Unveiled – for use with Fulham's **VIZION** AC Engines

With release of the FHSCP-UNV-6W-L-SD, Fulham brings you the most cost-effective 6W EM Driver specifically designed to operate Fulham VIZION AC LED engines (linear, round, rectangular). Factory or field installable. <https://www.fulham.com/product-systems/emergency-systems/hotspot-constant-power/hotspot-constant-power-for-ac-led-engines/>

Thank you for your interest in Fulham products. Please stay safe and healthy across this difficult time. Fulham appreciates your continued loyalty, friendship, and business.
